#### Description

##### **ASAM Criteria-(B)**

***Integrated treatment planning and documentation required to support current level of care and transition to other levels of care.***

This interactive, skills-based training will begin with a brief overview of the ASAM criteria and a cross-walk between the levels of care articulated in the ASAM criteria and the levels of care defined by the DMC-ODS Waiver. Following this brief review, the presenter will focus the remaining portion of the training on a detailed review of the four progress note formats approved for use in clinical files by SAPC, which are: (1) SOAP (Subjective, Objective, Assessment, and Plan); (2) GIRP (Goals, Intervention, Response, and Plan); (3) SIRP (Situation, Intervention, Response, and Progress); and (4) BIRP (Behavior, Intervention, Response, and Plan), followed by instruction on how to develop a comprehensive, individualized treatment plan. Each focus group format will be reviewed in detail, and participants will have the opportunity to practice drafting progress notes through a series of case scenarios.
